

## Pittwater Camera Club

### Preparing Images for Submission for Digital Projection

To help you select, re-size, save/export the images according to our club protocols, here is a step-by-step guide for you:

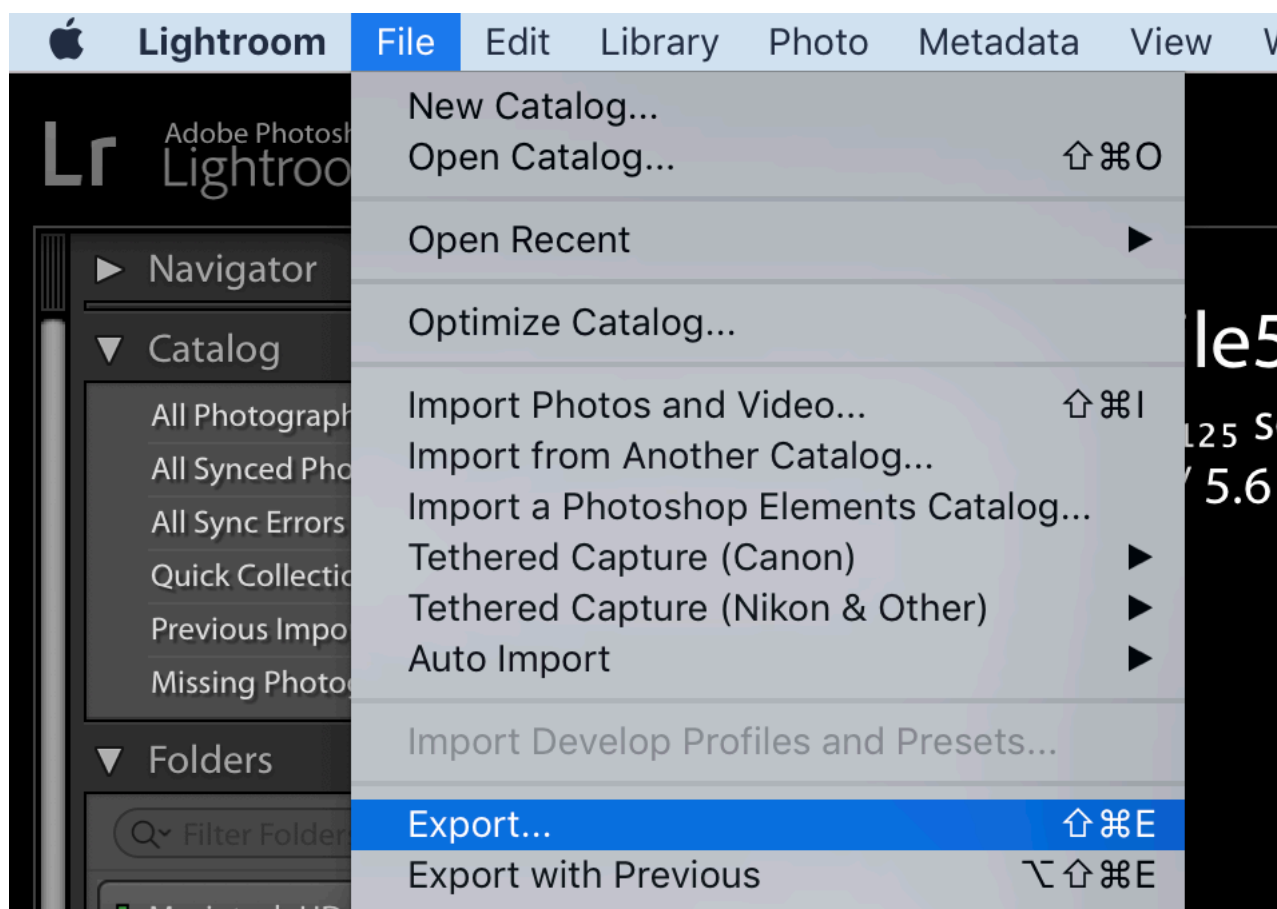

Projected Images:- Up to 2 projected images may be entered. Name the file with the title followed by the author's name. ie the\_shearers\_ben\_jones.jpg Do not use spaces in the file name. Use the underscore character instead. Use only lower case characters.

Entries to be submitted in JPEG format. Maximum horizontal dimension = 1920 pixels Maximum vertical dimension = 1200 pixels. Colour Profile: the images will be viewed on sRGB displays File size: Should not exceed 500kb. If exceeded, reduce accordingly.

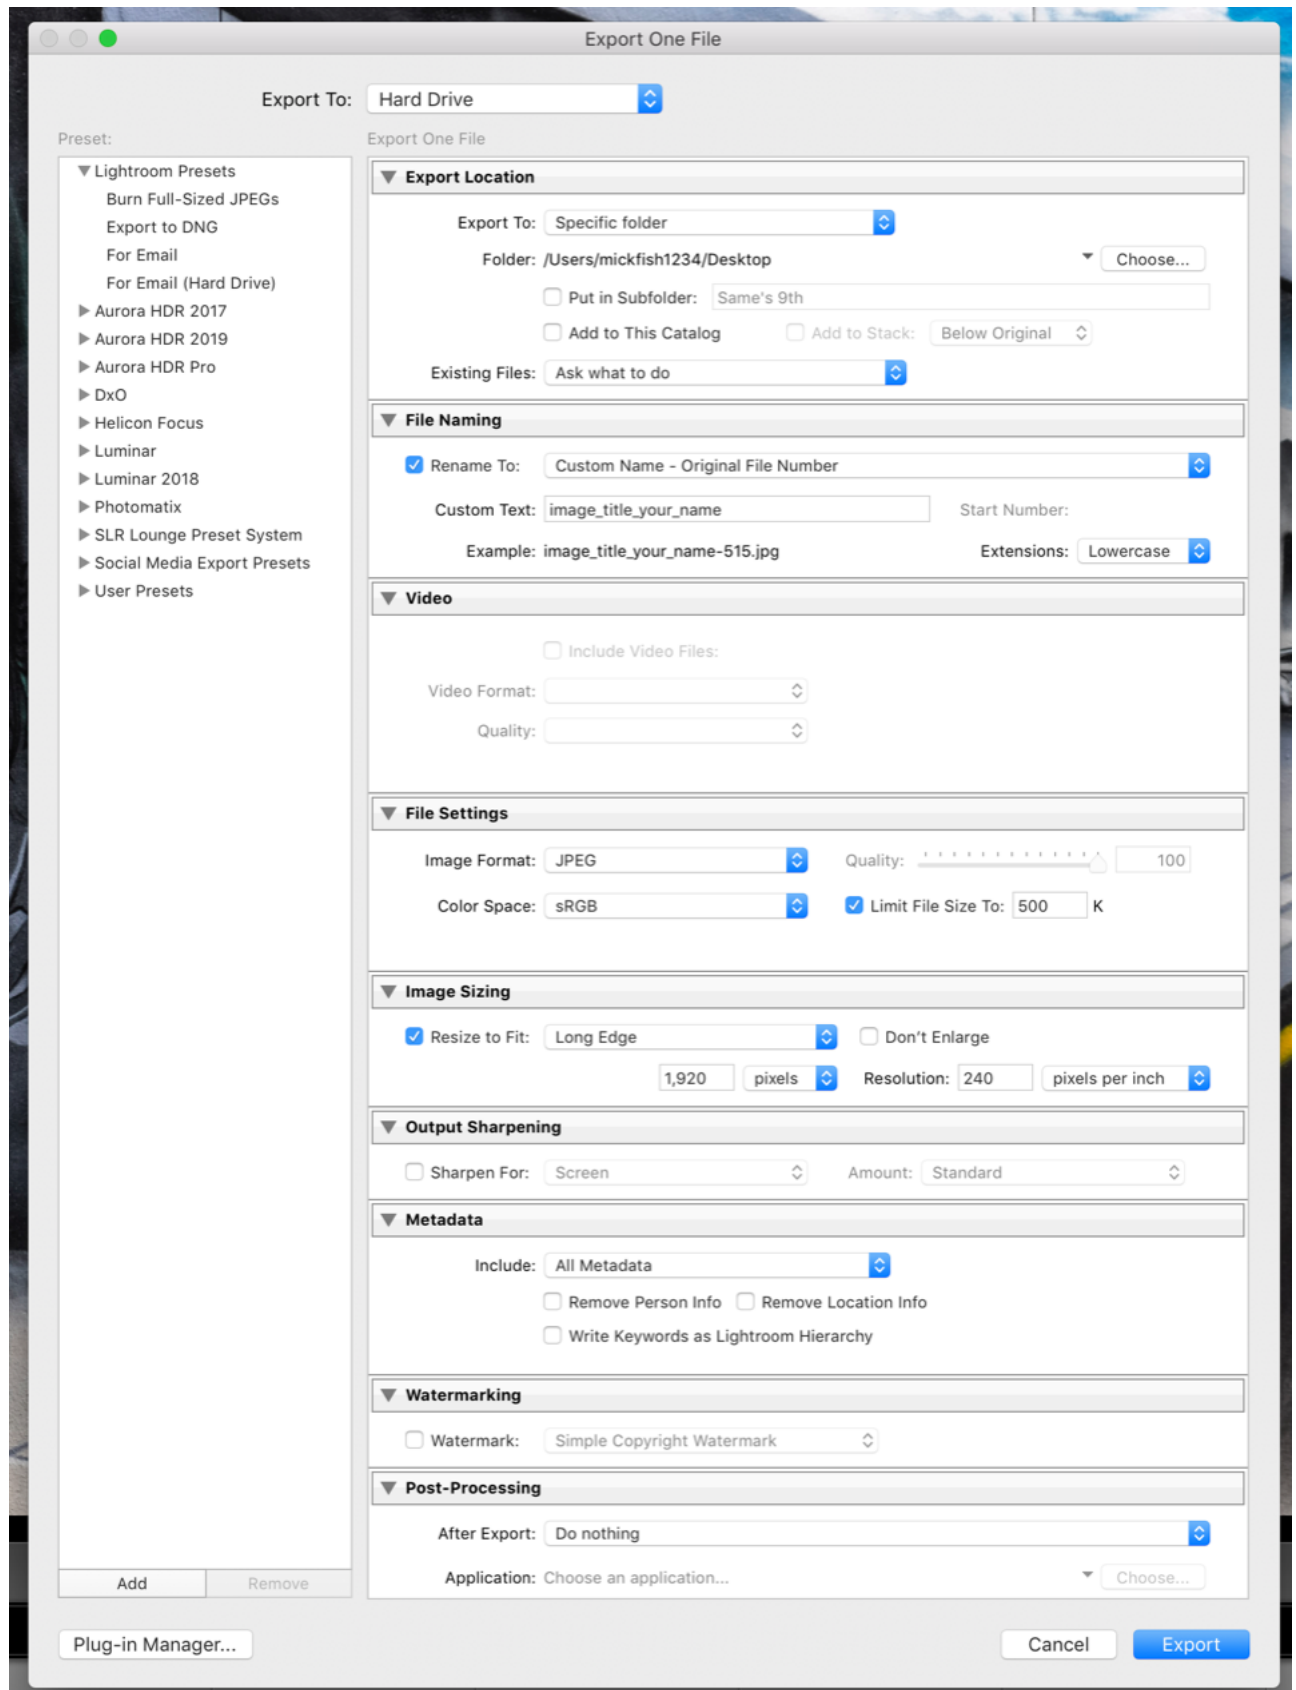

The following example screenshots are on a Mac but you should see the equivalents in Windows.

**If you have your image in Lightroom**, select the image you want to submit as a digital (projected) image.

Then from the top drop down menu select File/Export

Then it will open a dialogue box as below

Under “export Location, select where to export the file to- I suggest your Desktop.

Then name the file as per the club’s protocol: “image\_name\_you\_name” example”

“mt\_wilson\_diane\_ralph” (all lowercase)

Then go to File Settings and copy exactly as shown above : JPEG maximum 500k.  
Color space SRGB

Image Sizing: Tick “Resize to fit Long Edge 1920 pixels, Resolution 240

Then Click “Export”

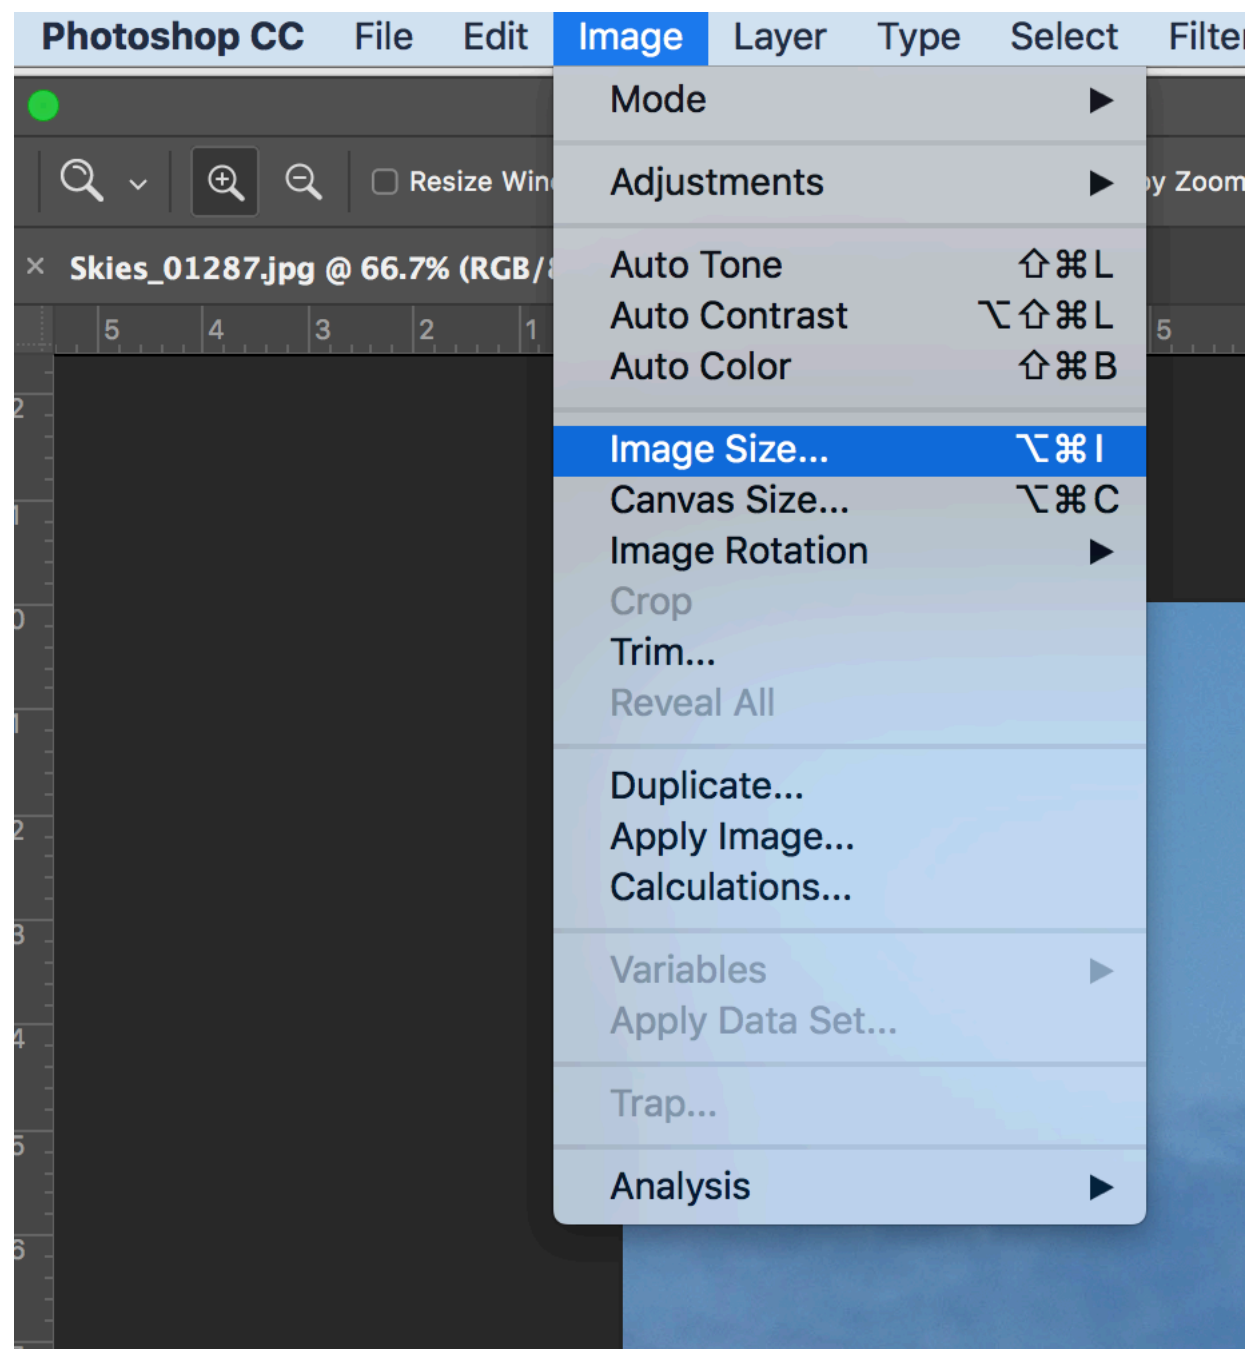

Finally email the file as saved from the export to you desktop to

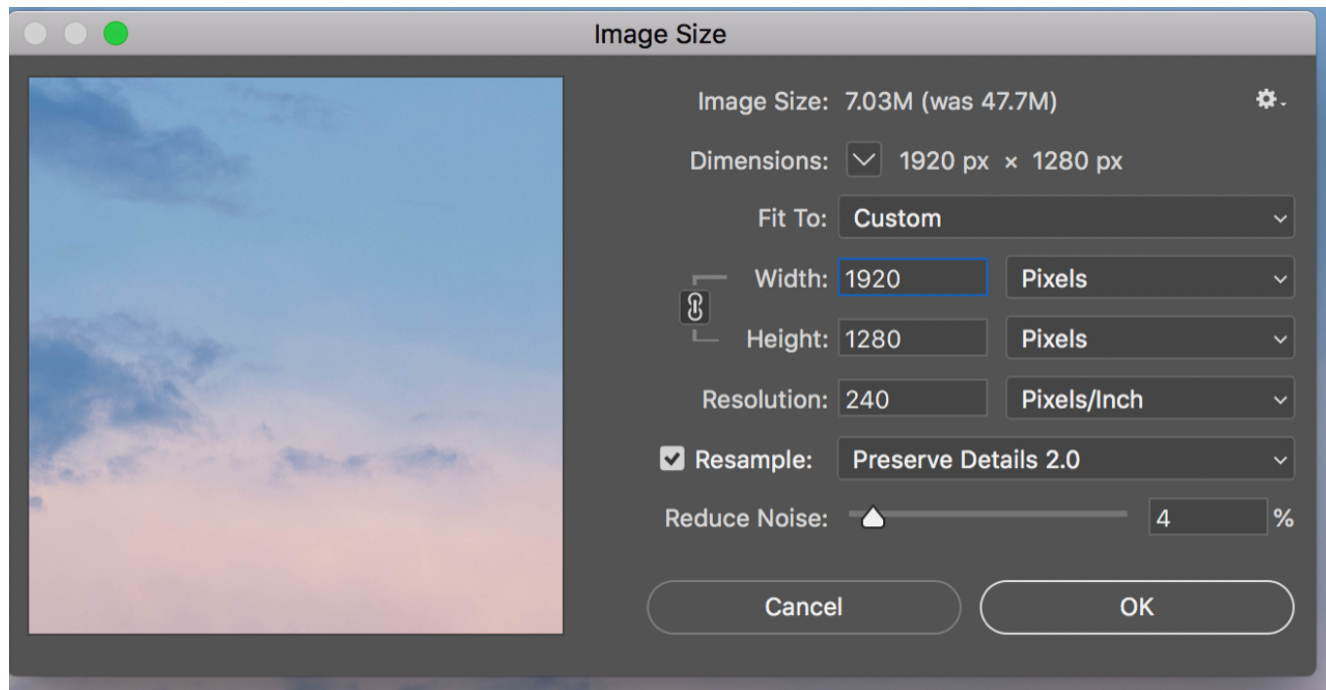

[entried@pittwatercameraclub.org](mailto:entried@pittwatercameraclub.org)

### **If you don't use Lightroom but have the image in Photoshop:**

First,once you have finished editing your image, flatten the file : from the drop-down at the top elect,Layers/ Flatten Image.

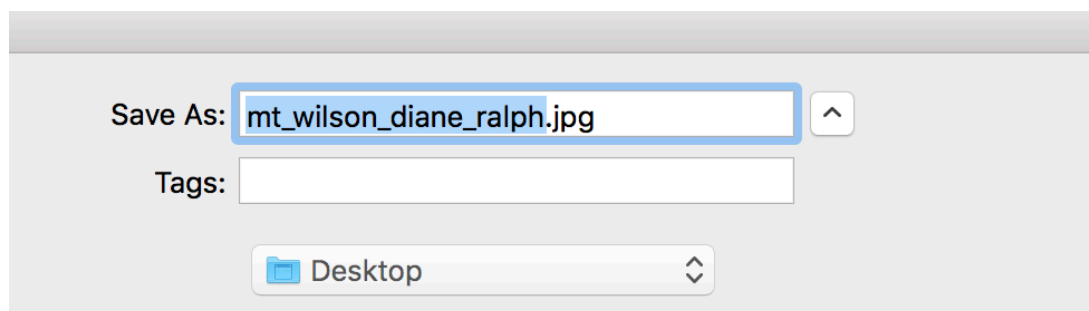

Next resize your image:

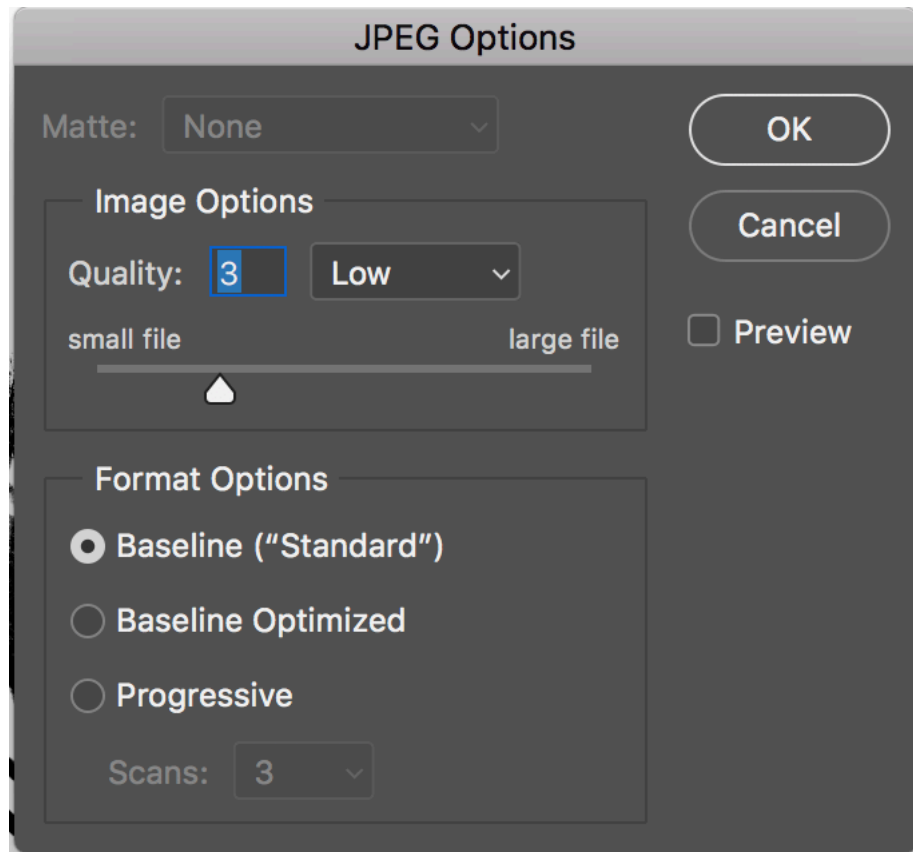

As per club rules, set the file size for th longest side (if that's the width) to 1920 pixels; the height is adjusted proportionately (if the image is portrait mode, the the height would be 1920)- resolution 240. Set resample as shown if you have the lest version of PS otherwise "bicubic reduction" or automatic. Click OK

Then from the top dropdown select "File/Save as.. And save to your Desktop -Select file type jpeg (jpeg)

The JPEG option box opens, slide quality slider to 3. Click OK

Check the file in Finder (if you've got a Mac) or in File Explorer in Windows and see that file size is no greater than 500kb (or pretty close either side to it)- If it's much larger or much smaller then re-save but adjust the quality slider down or up.

Then from the desktop email the file.

Alternatively: There is an Image resize app for Windows that can be downloaded at: <http://www.bricelam.net/ImageResizer/>

Entries are to be sent to [entries@pittwatercameraclub.org](mailto:entries@pittwatercameraclub.org) and must be received no later than 8pm on Sunday before competition. Refer to current Newsletter for latest competition details.
