## DEVELOP MODULE SHORTCUTS

### SHORTCUTS

Q = Spot Removal  
M = Graduated Filter  
Shift-M = Radial Filter  
K = Adjustment Brush  
Delete = Delete selected local  
adjustment or spot

Rating Workflow

**STEP 1**

Start in Grid view with large thumbnails. It's easier to make decisions when you're not bogged down in the details. Just flag or reject the ones you really like or don't like. Leave the rest unflagged.

**STEP 3**

Use the Attribute Filters to show only Flagged photos. Go back through the Flagged photos again, occasionally switching to Detail view to check focus.

**STEP 2**

Go to Photo menu > Use the Attribute Delete Rejected Photos Filters to show only to delete the really Unflagged photos, then bad photos from the give them 1 star. hard drive.

**STEP 4**

Some months later, go back through the 3 and 4 star photos and see if any need to be upgraded or downgraded. It's easier to make an objective decision when time has passed.

Step 2 should say: Delete rejected photos and give a 1-star rating to unflagged photos

RESULT	Meaning	What's Next...
🚩	Really bad photo worthy of deletion.	Nothing (deleted)
★	Should be deleted really, but I'm a packrat. Never to be seen again!	Nothing (ignored)
★★	Triggers a memory, but not great as a photo. The hotel room, a meal out with friends, etc.	A fast edit and a few keywords. They might end up in a photo book or slideshow, but they'll never be great photos in their own right.
★★★	Decent photo I'd be willing to show someone.	
★★★★	Good photo, might end up on the wall or social media.	A careful edit, possibly some Photoshop work, titles/captions and more extensive keywords. These are the photos that will end up on the wall or on social media.
★★★★★	Best photos ever taken. Rare!
